

## Why does **KOHLER** cost more?

*Like many engineered products, you basically get what you pay for- and Kohler generators are built to the most rigorous standards in the home generator industry. Here's several value reasons why:*

### ENGINE BLOCKS

#### **KOHLER**

26.9 lbs with oil pan

#### **COMPETITOR G**

19.6 lbs with oil pan

KOHLER commercial-grade engine block structure increases rigidity.

### CYLINDER HEADS

#### **KOHLER**

#### **COMPETITOR G**

The KOHLER cylinder head has angled valves and ports designed for flow rather than manufacturability.

### HYDRAULIC VALVE LIFTERS

#### **KOHLER**

#### **COMPETITOR G**

The KOHLER cylinder head has hydraulic valve lifters to eliminate the need to adjust valve lash.

### CRANKSHAFT/ PISTON/ ROD

#### **KOHLER**

#### **COMPETITOR G**

The KOHLER crankshaft has 500lb thrust and/or side-loading capability as well as flywheel side PTO capability.

### **KOHLER**

RCA air cooled units are engineered and tested to run **2000 hours continuously** in extreme heat/cold conditions – **that's 83 days & 8hrs, continuously!**

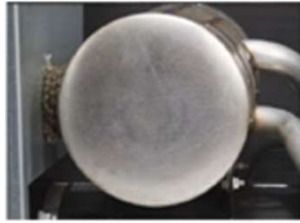

RCL liquid cooled models are capable of **3000 hours continuous operation** (125 days)

### **Competitor G**

Competitor G models are designed and engineered to last 2000-3000hrs of total life expectancy with proper service intervals.

## KOHLER

**KOHLER** uses insulated mufflers that result in quieter operation.

**KOHLER** uses high quality insulation in the intake and exhaust bulkheads for quieter operation.

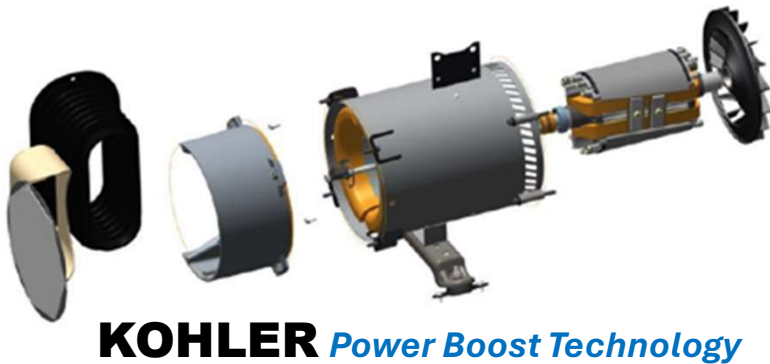

## COMPETITOR G

**Competitor G** Skimps on insulation, resulting in louder operation.

**Competitor G** Skimps on insulation, leading to louder, less refined performance.

## KOHLER Power Boost Technology

**KOHLER** specially designed and manufactures their own alternators. The windings are considerably larger and more robust, capable of handling intense voltage surges. **KOHLER'S Power Boost Technology** allows for high amperage startups like well pumps, and air conditioning without suffering a drop in power to other appliances.

## GENERATOR COLOR OPTIONS

KOHLER® Home Standby Generators

POWER.  
PEACE OF MIND.  
KOHLER.

### STANDARD COLORS

**CASHMERE**  
A warm, neutral tone that blends with a variety of exteriors.

**PEGASUS**  
A light, soft gray with a clean, contemporary feel.

**PIGEON FEATHER**  
A light, neutral gray that offers a subtle, classic appearance.

**DOVER GRAY**  
A mid-tone gray with cool undertones for a modern look.

**FRENCH GRAY LINEN**  
A refined gray with warm undertones for timeless appeal.

**NEVERGREEN**  
A natural green that blends seamlessly into outdoor environments.

**ROYAL HUNTER GREEN**  
A deep, rich green for a traditional, elegant look.

**ADMIRALTY**  
A strong, classic navy that makes a bold statement.

**CANYON BLUE**  
A medium blue with earthy tones for a distinctive look.

**BRICK DUST**  
A warm, earthy red that complements natural surroundings.

### MOSSY OAK® PATTERNS

**SHADOW GRASS HABITAT®**  
A natural grass pattern for a seamless, outdoor look.

**BREAK-UP COUNTRY®**  
A classic woodland pattern that blends into wooded surroundings.

**BUILT TO BLEND.  
BUILT TO PERFORM.**

Durable, all-weather finishes are engineered to stand up to the elements and look beautiful for years to come.

**KOHLER** offers custom colors at no extra charge on RCA models 14kW-26kW
